(54) Title: BRATTICH BOLT

(57) Abstract: A module (50) for a brattich bolt and a brattich bolt made from these modules (50), the modules (50) being made of a flexible material and having a substantially flat first surface (51) from which a plurality of spaced pins (52) protrude; one end of each pin (52) extends from the first surface (51) at an angle of about 60° to the surface (51); the other end (53) of the pin (52) is mounted in a rib (54) formed on a second surface of the module (50), the second surface also providing means (55, 56) for hinging the module (50) together.
